

**Wiltshire School of Gymnastics, Melksham**

**Client:** The Wiltshire School of Gymnastics, Melksham,

**Scope of Works:**

Steel framed extension to existing Gymnastics Hall with associated alterations to the existing building, external works and drainage.

The extension involved pad foundations & ground beams linking it to the existing structure with a combination of ground bearing and suspended concrete floor slab construction.

The steel frame structure has Euroclad roof coverings and elevations with automated opening aluminium windows and doors, to provide a 500m<sup>2</sup> multi-purpose Gymnastics Hall.

Internally, office space, staffroom, function room and WC's were formed together with associated mechanical and electrical installations.

Associated with the structure externally was the extension and reconfiguration of pedestrian and car park areas.

The project was completed for handover to the client on the original contract date.

**Contract Value:** £500,000

**Contract Programme:** 27 weeks
